Barrow Hanley Emerging Markets Value Fund
Barrow Hanley International Value Fund
Barrow Hanley Concentrated Emerging Markets ESG Opportunities Fund
Barrow Hanley Credit Opportunities Fund
Barrow Hanley Floating Rate Fund
Barrow Hanley Total Return Bond Fund
Barrow Hanley US Value Opportunities Fund
(the "Funds")

Supplement dated June 7, 2022 to:

- the Prospectus for the Barrow Hanley Emerging Markets Value Fund and Barrow Hanley International Value Fund dated December 29, 2021 (the "December 29, 2021 Prospectus");
- the Prospectus for the Barrow Hanley Concentrated Emerging Markets ESG Opportunities Fund, Barrow Hanley Credit Opportunities Fund, Barrow Hanley Floating Rate Fund, Barrow Hanley Total Return Bond Fund and Barrow Hanley US Value Opportunities Fund (the "April 12, 2022 Prospectus" and, together with the December 29, 2021 Prospectus, the "Prospectuses");
- the Summary Prospectuses for the Barrow Hanley Emerging Markets Value Fund and Barrow Hanley International Value Fund, each dated December 29, 2021 (the "December 29, 2021 Summary Prospectuses"); and
- the Summary Prospectuses for the Barrow Hanley Concentrated Emerging Markets ESG Opportunities Fund, Barrow Hanley Floating Rate Fund, Barrow Hanley Total Return Bond Fund and Barrow Hanley US Value Opportunities Fund, each dated April 12, 2022 (the "April 12, 2022 Summary Prospectuses" and, together with the December 29, 2021 Summary Prospectuses, the "Summary Prospectuses").

This supplement provides new and additional information beyond that contained in the Prospectuses and Summary Prospectuses, and should be read in conjunction with the Prospectuses and Summary Prospectuses.

The minimum initial investment amount for I Shares of the Funds has been reduced from \$500,000 to \$100,000. Accordingly, effective immediately, the Prospectuses and Summary Prospectuses are hereby amended and supplemented as followed:

1. *In the "Purchase and Sale of Fund Shares" sections of the Summary Prospectuses, the second sentence is hereby deleted and replaced with the following:*

To purchase I Shares of the Fund for the first time, you must invest at least \$100,000.

2. *In the "Summary Information about the Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation" sections of the Prospectuses, under the heading "Purchase and Sale of Fund Shares," the second sentence is hereby deleted and replaced with the following:*

To purchase I Shares of a Fund for the first time, you must invest at least \$100,000.

3. *In the "Purchasing, Selling and Exchanging Fund Shares" sections of the Prospectuses, the row relating to I Shares in the table under the "How to Choose a Share Class" heading is hereby deleted and replaced with the following:*

Class Name	Investment Minimums	Fees and Sales Charges
I Shares	Initial: \$100,000	Sales Charge – None
	Subsequent: \$50	12b-1 Fee – None
		Shareholder Servicing Fee - None

4. *In the “Purchasing, Selling and Exchanging Fund Shares” sections of the Prospectuses, under the heading “Minimum Purchases,” the first sentence is hereby deleted and replaced with the following:*

To purchase I Shares of a Fund for the first time, you must invest at least \$100,000.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <https://www.perpetual.com/mutual-funds/barrow-hanley-emerging-markets-value-fund>. You can also get this information at no cost by calling 866-778-6397, by sending an e-mail request to PerpetualFunds@seic.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated December 29, 2021, as they may be amended from time to time, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

Investment Objective

The Barrow Hanley Emerging Markets Value Fund (the “Emerging Markets Value Fund” or the “Fund”) seeks long term capital appreciation and consistent income from dividends.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may be required to pay commissions and/or other forms of compensation to a broker for transactions in I Shares, which are not reflected in the table or the example below.

Shareholder Fees (fees paid directly from your investment)

Redemption Fee (as a percentage of amount redeemed, if shares redeemed have been held for less than 30 days)	1.00%
--	-------

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	I Shares	Y Shares
Management Fees	0.87%	0.87%
Other Expenses	1.19%	1.34%
Shareholder Servicing Fees	None	0.15%
Other Operating Expenses ¹	1.19%	1.19%
Total Annual Fund Operating Expenses	2.06%	2.21%
Less Fee Reductions and/or Expense Reimbursements ²	(1.07)%	(1.07)%
Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements	0.99%	1.14%

¹ Other Operating Expenses are based on estimated amounts for the current fiscal year.

² Perpetual US Services LLC, doing business as PGIA (the “Adviser” or “Perpetual-PGIA”) has contractually agreed to waive fees and reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, shareholder servicing fees, acquired fund fees and expenses, other expenditures which are capitalized in accordance with generally accepted accounting principles and other non-routine expenses, such as litigation (collectively, “excluded expenses”)) from exceeding 0.99% of the Fund’s average daily net assets until February 28, 2023 (the “contractual expense

limit"). In addition, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. This agreement will terminate automatically upon the termination of the Fund's investment advisory agreement and may be terminated: (i) by the Board of Trustees (the "Board") of The Advisors' Inner Circle Fund III (the "Trust"), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on February 28, 2023.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses (including capped expenses for the period described in the footnote to the fee table) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years
I Shares	\$101	\$506
Y Shares	\$116	\$553

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the example, affect the Fund's performance. Because the Fund has not commenced operations as of the date of this prospectus, it does not have portfolio turnover information to report.

Principal Investment Strategies

Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in securities of companies based in emerging market countries and instruments with economic characteristics similar to such securities. This policy may be changed upon

60 days' prior written notice to shareholders. Emerging market countries are countries represented in the MSCI Emerging Markets Index, the MSCI Frontier Markets Index and to the extent not represented in those indexes, Singapore and Hong Kong. A company is based in an emerging market country if: (i) the company is organized or maintains its principal place of business in an emerging market country; (ii) the company's securities are traded principally in an emerging market country; (iii) at least 50% of the company's revenues or profits are generated in an emerging markets country; or (iv) at least 50% of the company's assets are located in an emerging markets country. The Fund invests principally in common stock and American Depositary Receipts ("ADRs"), including unsponsored ADRs, of companies of any market capitalization.

The Fund may invest in the securities of companies based in the People's Republic of China ("China"), including A Shares of such companies that trade on the Shanghai Stock Exchange and the Shenzhen Stock Exchange through the Shanghai – Hong Kong and Shenzhen – Hong Kong Stock Connect programs ("Stock Connect"). Stock Connect is a mutual stock market access program designed to, among other things, enable foreign investments in China.

Barrow, Hanley, Mewhinney & Strauss, LLC (the "Sub-Adviser" or "Barrow Hanley") pursues a value-oriented strategy and strives to construct a portfolio of securities, selected on a bottom-up basis, that trade at levels below the MSCI Emerging Markets Index across certain metrics, such as price/earnings (on normalized earnings), price to book, enterprise value to free cash flow and enterprise value to sales ratios, while simultaneously providing dividend yield above the MSCI Emerging Markets Index. Barrow Hanley's Emerging Markets Value team employs a two-stage process - incorporating both quantitative and qualitative elements - to manage their investment research effort. Initially, the team uses a valuation based, quantitative screen to narrow down a broad universe of approximately 5,500 emerging markets stocks to a universe of approximately 100-150 stocks (the "guidance list") that appear to Barrow Hanley to have attractive valuations and also exhibit stable to improving operating fundamentals, strong operating cash flow, and a responsible balance sheet. This guidance list serves as the beginning of Barrow Hanley's research team's qualitative assessment. The research team further refines the guidance list using sector-specific criteria (including, capital ratios for financials, price-to-net asset value metrics for energy, and other metrics), ultimately focusing on ideas that Barrow Hanley believes are compelling opportunities. In the fundamental stage of the investment process, the responsible analyst(s) conducts stock-specific research on each company of interest, including interviews with company management.

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any other government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Equity Risk – Since it purchases equity securities, the Fund is subject to the risk that stock prices may fall over short or extended periods of time. Historically, the equity market has moved in cycles, and the value of the Fund's securities may fluctuate from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility. Common stock is generally subordinate to preferred stock and debt securities with respect to the payment of dividends and upon the liquidation or bankruptcy of the issuing company.

Emerging Markets Securities Risk – The Fund's investments in emerging markets securities are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign securities. Unlike more established markets, emerging markets may have governments that are less stable, markets that are less liquid and economies that are less developed. In addition, the securities markets of emerging market countries may consist of companies with smaller market capitalizations and may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. Furthermore, foreign investors may be required to register the proceeds of sales, and future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies. Due to the differences in the nature and quality of financial information of issuers of emerging market securities, including auditing and financial reporting standards, financial information and disclosures about such issuers may be unavailable or, if made available, may be considerably less reliable than publicly available information about other foreign securities.

Custody Risk – Custody risk refers to the risks inherent in the process of clearing and settling trades and to the holding of securities, cash and other assets by local banks, agents and depositories. Low trading volumes and volatile prices in less developed markets make trades harder to complete and settle, and governments or trade groups may compel local agents to hold securities in designated depositories that may not be subject to independent

evaluation. Communications between the U.S. and emerging market countries may be unreliable, increasing the risk of delayed settlements or losses of security certificates. Practices in relation to the settlement of securities transactions in emerging markets involve higher risks than those in developed markets. In addition, the laws of certain countries may put limits on the Fund's ability to recover its assets if a foreign bank or depository or issuer of a security or an agent of any of the foregoing goes bankrupt. The Fund would absorb any loss resulting from such custody problems and may have no successful claim for compensation.

Foreign Company Risk – Investing in foreign companies, including direct investments and investments through ADRs, poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the “SEC”) and foreign companies are generally not subject to the same level of regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund's portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers and foreign markets and securities may be less liquid. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund.

Foreign Currency Risk – Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case the dollar value of the Fund's investments in securities denominated in, and/or receiving revenues in, foreign currencies, would be adversely affected.

Geographic Focus Risk – To the extent that it focuses its investments in a particular country or geographic region, the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that country or geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

Risk of Investing in China – The Chinese economy is generally considered an emerging market and can be significantly affected by economic and

political conditions and policy in China and surrounding Asian countries. A relatively small number of Chinese companies represents a large portion of China's total market and thus may be more sensitive to adverse political or economic circumstances and market movements. The economy of China differs, often unfavorably, from the U.S. economy in such respects as structure, general development, government involvement, wealth distribution, rate of inflation, growth rate, allocation of resources and capital reinvestment, among others. Under China's political and economic system, the central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership. In addition, expropriation, including nationalization, confiscatory taxation, political, economic or social instability or other developments could adversely affect and significantly diminish the values of the Chinese companies in which the Fund invests. The Fund may invest in shares of Chinese companies traded on stock markets in China or Hong Kong. These stock markets have recently experienced high levels of volatility, which may continue in the future. The Hong Kong stock market may behave differently from the China stock markets and there may be little to no correlation between the performance of the Hong Kong stock market and the China stock markets.

Stock Connect Investing Risk – Trading through Stock Connect is subject to a number of restrictions that may affect the Fund's investments and returns. For example, trading through Stock Connect is subject to daily quotas that limit the maximum daily net purchases on any particular day, which may restrict or preclude the Fund's ability to invest in China A Shares through Stock Connect. In addition, investments made through Stock Connect are subject to trading, clearance and settlement procedures that are relatively untested, which could pose risks to the Fund. Moreover, China A Shares purchased through Stock Connect generally may not be sold, purchased or otherwise transferred other than through Stock Connect in accordance with applicable rules. A primary feature of Stock Connect is the application of the home market's laws and rules applicable to investors in China A Shares. Therefore, the Fund's investments in China A Shares purchased through Stock Connect are generally subject to Chinese securities regulations and listing rules, among other restrictions. While overseas investors currently are exempt from paying capital gains or value added taxes on income and gains from investments in China A Shares purchased through Stock Connect, these tax rules could be changed, which could result in unexpected tax liabilities for the Fund. Stock Connect will only operate on days when both the China and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. There may be occasions when the Fund may be subject to the risk of price fluctuations

of China A Shares during the time when Stock Connect is not trading. Stock Connect is a relatively new program. Further developments are likely and there can be no assurance as to the program's continued existence or whether future developments regarding the program may restrict or adversely affect the Fund's investments or returns. In addition, the application and interpretation of the laws and regulations of Hong Kong and China, and the rules, policies or guidelines published or applied by relevant regulators and exchanges in respect of Stock Connect are uncertain, and they may have a detrimental effect on the Fund's investments and returns.

Large Capitalization Risk – The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Small and Medium Capitalization Risk – The risk that small and medium capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small and medium capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Small capitalization and medium capitalization stocks may be traded OTC. OTC stocks may trade less frequently and in smaller volume than exchange listed stocks and may have more price volatility than that of exchange-listed stocks.

Depository Receipts Risk – While ADRs provide an alternative to directly purchasing the underlying foreign securities in their respective national markets and currencies, investments in ADRs continue to be subject to many of the risks associated with investing directly in foreign securities. Investments in ADRs may be less liquid and more volatile than the underlying securities in their primary trading market. If an ADR is denominated in a different currency than its underlying securities, the Fund will be subject to the currency risk of both the investment in the ADR and the underlying security. Holders of ADRs may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action. The prices of ADRs may differ from the prices of securities upon which they are based.

The Fund may invest in unsponsored ADRs, which are issued by one or more depositaries without a formal agreement with the company that issues the underlying securities. Holders of unsponsored ADRs generally bear all the costs thereof, and the depositaries of unsponsored ADRs frequently are

under no obligation to distribute shareholder communications received from the issuers of the underlying securities or to pass through voting rights with respect to the underlying securities. In addition, the issuers of the securities underlying unsponsored ADRs are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the ADRs.

Active Management Risk – The Fund is subject to the risk that the Adviser's or the Sub-Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect. If the investments selected and strategies employed by the Fund fail to produce the intended results, the Fund could underperform in comparison to its benchmark index or other funds with similar objectives and investment strategies.

New Adviser Risk – The Adviser is a newly registered investment adviser and has not previously managed a mutual fund. As a result, there is no long-term track record against which an investor may judge the Adviser and it is possible the Adviser may not achieve the Fund's intended investment objective.

New Fund Risk – Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

Value Style Risk – The Adviser's and the Sub-Adviser's value investment style may increase the risks of investing in the Fund. If the Adviser's or the Sub-Adviser's assessment of market conditions, or a company's value or prospects for exceeding earnings expectations is inaccurate, the Fund could suffer losses or produce poor performance relative to other funds. In addition, "value stocks" can continue to be undervalued by the market for long periods of time.

Market Risk – The prices of and the income generated by the Fund's securities may decline in response to, among other things, investor sentiment, general economic and market conditions, regional or global instability, and currency and interest rate fluctuations. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and

liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Market risk may affect a single issuer, an industry, a sector or the equity or bond market as a whole.

Management/Systematic or Quantitative Process Risk – The value of the Fund may decline if the Adviser's or the Sub-Adviser's judgments about the attractiveness, relative value or potential appreciation of a particular security or strategy prove to be incorrect. Because the Adviser and the Sub-Adviser each relies, in part, on a systematic, quantitative screening process in selecting securities for the Fund, the Fund is subject to the additional risk that the Adviser's or the Sub-Adviser's judgments regarding the investment criteria underlying the screening process may prove to be incorrect.

Performance Information

The Fund is new, and therefore has no performance history. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future and does not guarantee future results.

Updated performance information is available on the Fund's websites at Perpetual.com and BarrowHanley.com or by calling toll-free to 866-778-6397.

Investment Advisers

Perpetual US Services LLC, doing business as PGIA serves as investment adviser to the Fund. Barrow Hanley serves as investment sub-adviser to the Fund and is responsible for the management of the Fund's portfolio of securities. Each of the investment adviser and the investment sub-adviser is a subsidiary of Perpetual Limited, an Australian Stock Exchange-listed, diversified financial services company.

Portfolio Managers

Randolph Wrighton, Jr., CFA, Senior Managing Director, Equity Portfolio Manager and Analyst at Barrow Hanley has managed the Fund since its inception in 2021.

Sherry Zhang, CFA-Managing Director, Equity Portfolio Manager and Analyst at Barrow Hanley has managed the Fund since its inception in 2021.

David Feygenson, Director, Equity Portfolio Manager and Analyst at Barrow Hanley has managed the Fund since its inception in 2021.

Purchase and Sale of Fund Shares

You may generally purchase or redeem shares on any day that the New York Stock Exchange (“NYSE”) is open for business.

To purchase I Shares of the Fund for the first time, you must invest at least \$500,000.

To purchase Y Shares of the Fund for the first time, you must invest at least \$2,500.

Subsequent investments must be made in amounts of at least \$50. The Fund may accept investments of smaller amounts in its sole discretion.

If you own your shares directly, you may redeem your shares by contacting the Fund directly by mail at: Perpetual Funds, PO Box 588, Portland, ME 04112 (Express Mail Address: Perpetual Funds c/o Atlantic Shareholder Services, LLC, Three Canal Plaza, Ground Floor, Portland, ME 04101) or telephone at 866-778-6397.

If you own your shares through an account with a broker or other financial intermediary, contact that broker or financial intermediary to redeem your shares. Your broker or financial intermediary may charge a fee for its services in addition to the fees charged by the Fund.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or IRA, in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s web site for more information.
